

GREEN IS HEALTHY

HOW TO MAKE BOKASHI COMPOST

BOKASHI COMPOSTING EQUIPMENTS

- ▶ Bokashi Bucket
- ▶ Bucket Lid
- ▶ Smash Equipment
- ▶ Woodshavings
- ▶ Unbleached paper/Wrap/packages
- ▶ Special PH Conditioner Liquid
- ▶ Waste types such as vegetable & fruit parts,seeds
 - plants/herbs
 - eggshells
 - meal leftovers
 - tea and coffee leftovers

a bucket

Ph conditioner liquid

smash equipment

unbleached paper/wrap/packages

woodshavings

kitchen waste

A few days later

two weeks later

After burying the compost into the soil, it turns into kind of humid ,rich and mineral soil in a year

The kitchen waste is decomposed.
You can see the eggshells in it.

Your soil is ready to use !

Differences between Bokashi Composting & Traditional composting

- much quicker
- gives off less smell
- takes up less space
- you can do it at home or in your apartment

- it last longer
- gives off bad smell
- you need more space
- you need a big garden, open area

Thanks for listening to us Green Friends,

Greetings from Turkey
